EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 58 **Subject Index** **2004**

Evolution, 58(12), 2004, pp. 2845–2849

ADAPTATION

Adaptation, bacteriophage, constraint, evolution, experimental evolution, fitness limit, genomes, 692

Adaptation, *Chaetodipus*, cline, *Mc1r*, melanocortin-1 receptor, migration, selection coefficient, 1329

Adaptation, dispersal, ecological speciation, *Gasterosteus aculeatus*, microsatellites, migration, natural selection, population mixing, 2319

Adaptation, epistasis, group selection, shifting balance, species range, 211

Adaptation, genotype-by-environment interaction, growth compensation, growth rate evolution, lizard, phenotypic plasticity, 862

Antagonistic pleiotropy, fitness quantitative trait loci, genetic trade-off, heterosis, *Hordeum spontaneum*, local adaptation, 270

Arabidopsis thaliana, genotype-by-environment interaction, natural selection, phototropins, phototropism, 515

Batesian mimicry, generalized linear model analysis, hoverflies, Hymenoptera, Syrphidae, 367

Body, *Curculio*, morphology, predation, seed, size, 1971

Bufo, F_{ST}, local adaptation, microsatellite loci, population differentiation, Q_{ST}, salinity tolerance, 2343

Calopteryx haemorrhoidalis, cryptic female choice, damselfly, genital evolution, phenotypic differentiation, sexual selection, 349

Co-gradient variation, counter-gradient variation, geographic range limits, geographic variation, phenotypic plasticity, reciprocal transplant, species borders, 59

Color, contemporary evolution, continuous trait, local selection, new environment, 81

Cost, host, insecticide, microsporidia, mosquito, parasite, resistance, 579

Development time, fitness components, fluctuating asymmetry, insensitive acetylcholinesterase, over-produced esterases, wing length, 128

Evolutionary conflicts, logistic selection gradients, offspring size, seed-mass evolution, seed predators, selection episodes, 71

Male-driven evolution, sex-biased mutation, sex chromosomes, sexual selection, substitution rate, 437

ADAPTIVE RADIATION

Bruchidae, Cerambycidae, Chrysomelidae, herbivory, insect-plant interactions, parasite-host interactions, phylogeny, 1984

Comparative genomics, essential eukaryotic core, *Pneumocystis carinii*, 441

β-fibrinogen, convergence, Coronaves, Metaves, Neovaes, parallelism, systematics, 2558

BEHAVIOR

Artificial selection, dopamine, exercise, microarray, transcription, 2079

Baldwin effect, behavior, habitat choice, learning, plasticity, resource preference, 757

Fecundity, lizards, major histocompatability complex, paternity bias, sperm competition, 906

BIOGEOGRAPHY

Admixture, Bayesian methods, microsatellites, population genetic structure, postglacial recolonization, 976

Apodemus, climate change, evolutionary rates, incisor, island rule, Japan, size, 1353

Bayesian analysis, biogeography, heteroplasmy, hypothesis testing, mitochondrial ribosomal DNA, parametric bootstrapping, 2517

Biodiversity anomaly, eastern Asian-eastern North American floristic disjunction, molecular phylogeny, rate of ITS evolution, rate of speciation, 2175

Biogeography, dispersal, island colonization, Madagascar, Papilionidae, speciation, vicariance, 2762

Dendrobatidae, Ecuador, geographic information systems, modes of speciation, niche modeling, phylogeography, 1781

Dispersal, Gondwana, molecular clock, out-of-India hypothesis, vicariance, 1871

Genetic divergence, glaciation, latitudinal variation, speciation, species richness, 938

BOOK REVIEWS

Alfred Russel Wallace: in a court of his own, a review of *The Heretic in Darwin's Court: The Life of Alfred Russel Wallace*, by John van Wyhe, 2839

Comprehensive reference for evo-devo or collective challenge to neo-Darwinism?, a review of *Keywords and Concepts in Evolutionary Developmental Biology*, by Ehab Abouheif, 2836

Do the I_{mates} have it?, a review of *Mating Systems and Strategies*, by Darryl T. Gwynne and Clint D. Kelly, 1877

Evolution of salmon life histories, a review of *Evolution Illuminated: Salmon and Their Relatives*, by Gerald Smith, 1634

Macroecology from a sawfly's perspective, a review of *Macroevolutionary Theory on Macroecological Patterns*, by Niklas Janz, 1880

The biology of demons, a review of *Sex Wars: Genes, Bacteria and Biased Sex Ratios*, by Benjamin B. Normark, 676

When good plants go bad . . . , a review of *Dangerous Liaisons? When Cultivated Plants Mate with Their Wild Relatives*, by John M. Burke, 1637

CHROMOSOMAL EVOLUTION

Cryptogeography, haplotype network, multiple origins, phylogeography, polyploidy, statistical parsimony, triploidy, 284

COEVOLUTION

Apterostigma, Attini, fungiculture, fungus-growing ants, Pterulaceae, 2252

Coevolution, genetic correlation, multispecific coevolution, pleiotropy, specialization, 1165

Conflicting selection, *Eucosma recissoriana*, geographic mosaic theory of coevolution, *Loxia curvirostra*, *Pinus contorta* ssp. *latifolia*, predator-prey interactions, seed predation, 95

COMPETITION

Adaptive dynamics, competition, diversification, fitness minimum, frequency-dependent selection, niche width, sympatric speciation, 2599

Competitive speciation, fitness function, *Gasterosteus aculeatus*, individual specialization, stable fitness minima, 608

© 2004 The Society for the Study of Evolution. All rights reserved.

Development
Comparative biology, *Crepidula, Crucibulum,* mode of development, nurse-eggs, 1488
Development, evolution, *Hox* genes, limb, limblessness, lizard, snake, 2103
Development, evolution, limb, limblessness, lizard, snake, 2107

Epistasis
Adaptation, additive variance, multilocus diffusion approximations, population bottlenecks, quantitative genetics, shifting balance, 2111

Evolutionary Genomics
Classical polyandry, coevolution, feedback, mating scrambles, quantitative genetic model, reversed sex roles, trade-off, 24
Cultural evolution, cultural transmission, human culture, Lamarckian inheritance, memes, natural selection, *The Origin of Species,* 1

Fitness
Allelic richness, drift load, extinction risk, *Lymnaea stagnalis,* mutational meltdown, trematode parasites, 749
Functional genomics, male dominance, seminatural population, *t* complex, transmission distortion, 1318

Fossils
Calibration, Crocodylia, fossil, molecular clock, quartet dating, 1375

Gene Flow
Africanization, Africanized honeybee, *Apis mellifera,* biological invasion, mitochondrial DNA haplotype, mitotype, 1047
Coalescent, divergence population genetics, DUI, gene flow, interlocus contrasts, phylogeography, 2438
Coancestry, *Crocidura russula, F*-statistics, individual-based models, local competition, variance analysis, 886
Gene flow, genetic markers, genotypic exclusion, mating model, parentage analysis, 956

Genetic Variation
Adaptation, association study, melanocortin-1 receptor, molecular evolution, pigmentation, Squamata, 1794
Color polymorphism, epistasis, Fundulidae, heritable plasticity, ultraviolet light, 1086

Heritability
Across-environment additive genetic correlation, distribution of genetic variation, genetic constraint, global warming, heritability, 1459
Additive genetic variance, common brood environment effect, genotype-environment interaction, *Parus caeruleus, Protocalliphora,* tarsus length, 203
Architecture, broad-sense heritability, community genetics, *Populus,* scaling, 2100

Hybridization
Ambystoma californiense, Ambystoma tigrinum mavortium, heterozygote deficit, hybridization, invasive species, linkage disequilibria, mosaic hybrid zone, 1282
Amphibian, development, divergence, embryos, light, local adaptation, temperature, 160
Assignment tests, Darwin's finches, introgression, microsatellites, selection, 1588
Climate, hybridization, introgression, pollen dispersal, *Quercus wislizeni,* red oaks, 261
Cline, ecotone, El Niño, hybridization, introgression, local adaptation, speciation, 1108
Ecotone, gene flow, hybrid zone, mate choice, *Melospiza melodia,* signaling, song sparrow, speciation, 2144
Geographic information system, hybridization, hybrid zones, range boundaries, reinforcement, spatial concentration, speciation, 2391
Inbreeding depression, mating patterns, natural hybridization, paternity analysis, reproductive isolation, spatial autocorrelation, 2669
Introgression, microsatellites, *Mus musculus domesticus,* Robertsonian fusions, speciation, 184

Inbreeding
Breeding behavior, fitness, pinniped, male-male competition, microsatellite, heterozygosity, inbreeding, single-locus effect, 2087
Dispersal, gene flow, immigration, inbreeding, philopatry, reproductive success, 2546
Environmental variation, heterozygosity, inbreeding avoidance, inbreeding depression, maternal effects, microsatellites, survival, 2037
Heterozygosity, inbreeding depression, linkage disequilibrium, major histocompatibility complex, microsatellite, 870

Introgression
Developmental constraint, fluctuating asymmetry, resource allocation, thermoregulation, 360

Life-History Evolution
16S rDNA, brooding, Cerithioidea, freshwater gastropods, Pachychilidae, viviparity, 2215
Acoustic signaling, costs of immunity, *Gryllus campestris,* life-history trade-offs, longevity, nutritional condition, sexual selection, 2280
Age at first reproduction, inbreeding avoidance, inbreeding depression, mating behavior, parasite life history, *Schistocephalus solidus,* self-fertilization, 2591
Akaike's information criterion, Atlantic silversides, cost of growth, growth trade-off, *Menidia menidia,* optimal control, swimming performance, 661
Allozymes, gene diversity analysis, life-history evolution, Pacific salmon, parallel speciation, run timing, 386
Alternative tactics, game theory, life history, smallmouth bass, tactic alternation, 1530
Amphibians, ancestral states, direct development, larvae, life history, phylogeny, Plethodontidae, 2808
Ancestral character state reconstruction, Isthmus of Panama, larval development, life-history evolution, 2718
Ancestral state reconstruction, diapause, generalized least squares, life-history evolution, phylogeny, 175
Body size, *Callosobruchus maculatus,* development time, host shift, intraspecific competition, life-history evolution, selection experiment, 2787
Caenorhabditis elegans, life-history evolution, self-fertilization, sperm-limitation, 651
Comparative approach, convergent evolution, *Drosophila subobscura,* experimental evolution, local adaptation, 1503
Correlational selection, fitness, insurance ova, lambda, life history, twins, *Homo sapiens,* 430
Developmental plasticity, evolutionarily stable strategy model, parasite evolution, sexual reproduction, strain polymorphism, 989
Dispersal, growth analysis, invasiveness, latitude, nucleotypic effect, phylogenetically independent contrasts, seed size, 1705
Eusocial, fecundity, morphological modification, naked mole-rat, progesterone, vertebrate, 1600
Hemolymph, immunocompetence, life-history trade-off, sexual dimorphism, sexual selection, survivorship, 2478
Immune response, *Mhc* class I genotype, Newcastle disease virus, reproductive effort, terminal investment, trade-off, 2822
Independent contrasts, life history, phrynosomatid, phylogenetic comparative method, *Sceloporus undulatus,* 619

Macroevolution
16S rRNA, lateral gene transfer, macroevolution, microbes, phylogeny, 946
Ancestral state reconstruction, Bergmann's rule, body size, phylogenetic signal, species-level heritability, species-level trait, tetrapods, 1674
Cospeciation, *Epicephala,* fig wasp, *Glochidion,* obligate pollination mutualism, phylogeny, yucca moth, 2201
Division of labor, size quorum sensing, size rules. 1883
Extinction, macroecology, macroevolution, occupancy, phylogeny, range size, speciation, 2622

Maternal Effect
Acclimatization, Coccidae, Hermiptera, maternal effects, plant-herbivore interactions, *Saissetia coffeae,* transgenerational prophylaxis, 2452
Aggression, animal model, early development, hormones, mating preference, quantitative genetics, song rate, 2574

Mating System
Allee effect, density regulation, mating system evolution, reproductive assurance, self-fertilization, 2613
Allometry, floral morphology, frequent-dependent selection, geographical variation, *Narcissus triandrus,* style-morph ratios, tristyly, 964
Angiosperms, breeding system, dioecy, ecological correlations, extinction, phylogeny, sister-group comparison, speciation, 723
Aquilegia canadensis, autogamy, biparental inbreeding, geitonogamy, herkogamy, inbreeding, mating-system evolution, self-fertilization, 2693
Arenaria uniflora, autogamy, floral morphology, genetic architecture, hybrid sterility, mating system evolution, postzygotic isolation, 296
Cryptic female choice, genetic incompatibility, inbreeding, mate choice, multiple mating, polyandry, sexual selection, 2472
Cytoplasmic inheritance, heteroplasmy, linear dominance hierarchy, *Physarum polycephalum,* preferential digestion of mitochondria, self-incompatible mating type, 710
Genotype reconstruction, lemon shark, microsatellites, parentage assignment, polyandry, relatedness, 2332
Guppy, paternity, polyandry, precedence, P_2, 1846
Inbreeding depression, mating systems, pollen limitation, reproductive compensation, self-incompatibility, 1924
Mating frequency, natural selection, polyandry, social insects, sperm, 1056
Multiple mating, offspring viability, polyandry, reproductive success, sexual selection, sperm competition, 1242

Models/Simulations
Adaptive speciation, assortative mating, constraint, evolutionary branching, speciation rate, 895
Complementation, experimental evolution, frequency-dependent selection, quasispecies, vesicular stomatitis virus, 900
Diversity, evolutionary rates, extinction, likelihood, taxon pairs, 12
Driver, migration, sex ratio, suppressor, X chromosome polymorphism, Y chromosome polymorphism, 925
Evolutionarily stable strategy, host-pathogen interaction, plant-herbivore interaction, resistance, tolerance, 1685

Molecular Evolution
Adaptation, gene flow, metapopulations, organ-driven selection, viral dynamics, viral evolution, 1185
Comparative genomics, *Drosophila,* fast-X evolution, large X effect, speciation, 656
East Mediterranean, local molecular clock, *Mesobuthus,* nuclear protein-coding DNA, scorpions, 2486

Morphological Evolution
Adaptive radiation, allopatric divergence, contemporary evolution, *Gasterosteus aculeatus,* invasion, lateral plates, postglacial evolution, 814
Biodiversity, deep sea, gastropods, morphological disparity, shell form, 338
Biomechanics, character evolution, convergence, disparity, four-bar, Labridae, natural selection, 495
Ciona intestinalis, Distaplia occidentalis, kinematics, larvae, morphology, morphospace, urochordata, 1209
Cline, contingency, haldanes, latitude, rapid evolution, size, 768
Common garden experiment, dark-eyed junco, evolutionary rates, genetic drift, *Junco hyemalis,* phenotypic plasticity, selection, 166
Common garden experiment, divergent natural selection, ecomorphology, fitness trade-offs, geometric morphometrics, population differentiation, predator-prey interactions, 2305
Development, evolution, heterochrony, modularity, statistical test, 1852
Development, evolutionary constraint, mammalia, marsupial, reproductive mode, scapula, shoulder girdle, 2353

Parasitism
Abnormal abdomen, genetic variation, host-parasite interactions, interspecific variation, intraspecific variation, nematode parasitism, 587
Cross-fertilization, heterozgosity, inbreeding depression, resistance, self-fertilization, 2747
Cyprinidae, *Dactylogyrus,* intrahost speciation, molecular phylogeny, Monogenea, niche preference, 1001
Cytochrome *b,* DHFR-TS, *Haemoproteus, Plasmodium,* reproductive isolation, 1617
Epidemiology, evolution, parasite, transmission, virulence, 455

Parthenogenesis
Clones, gynogenesis, morphology, *Phoxinus,* polyploidy, unisexual vertebrates, 1261
Developmental stability, incubation, lizard, parthenogenesis, phenotypic plasticity, temperature, 1560

Phenotypic Plasticity
Adaptive plasticity, *Impatiens capensis,* phenolic compounds, phytochrome, production costs, red:far-red cues, shade-avoidance responses, ultraviolet radiation, 2645
Animal model, breeding values, *Ficedula albicollis,* heritability, long-term study, NAO index, phenotypic plasticity, 634
Continuous reaction norms, genetic variation, insect growth, performance curves, temperature, 1521
Development, genotype-by-environment interaction, life history, otolith, phenotypic plasticity, *Salmo salar,* threshold trait, 136
Echinodermata, heterochrony, life-history evolution, metamorphosis, phenotypic plasticity, planktotrophy, thyroxine, 524

Phylogenetics
Amplified fragment length polymorphism, cytochrome *b,* electric fish, gene trees, hybridization, signal evolution, 825
Avian evolution, birds, Neoaves, phylogeny, polytomy, power test, rapid radiation, 404
Brood care, bubble nesting, comparative method, mitochondrial DNA, phlogenetic generalized least-squares, phylogeny, RAG1, 799
Codivergence, cophylogeny, fungal pathogen, mutualism, reconciliation analysis, symbiosis, 1909
Dispersal, *Euastacus,* evolution, freshwater crayfish, mitochondrial DNA, phylogenetic biogeography, simultaneous vicariance, 1073

Phylogeography
Adaptive divergence, environmental change, evolution of migration, mitochondrial control region, population genetic structure, mismatch distribution, postglacial expansion, *Sylvia atricapilla,* 1819
Alpine, biogeography, Lepidoptera, nested clade, paleoclimate, Rocky Mountains, 113
Anuran, glaciation, mismatch distribution, nested clade, North America, *Rana pipiens,* 145
Argentina, cytochrome *b,* introgression, lineage sorting, *Liolaemus,* phylogeography, 842
Aves, Amazonia, Miocene marine incursion hypothesis, phylogeography, population genetics, refuge hypothesis, riverine barrier hypothesis, 1303
Biodiversity, conservation, endemism, mitochondrial DNA, refugia, Sulawesi, 1394
Biogeography, cytochrome oxidase II, disjunct populations, marine zooplankton, mitochondrial DNA, 1472
Cheater, exploitation, hybridization, incomplete lineage sorting, phylogeography, pollination mutualism, 2266

Physiology
Bergmann's rule, body size, comparative methods, diet, endothermy, energetics, temperature, 1361
Global climate change, life-history evolution, reciprocal transplants, seasonal selection, stress tolerance, thermal and photoperiodic adaptation, 1748

Plant-Insect Interaction
Adaptation, clutch size, geographic variation, gregariousness, life-history evolution, plant-insect interactions, 447
Ant-plant interactions, cost-benefit models, extrafloral nectar, mutualism, selection analysis, 2657
Claytonia virginica, floral-color evolution, herbivory, maintenance of polymorphism, phenotypic selection, pollination ecology, pollinator-mediated selection, 2426
Costs, genetic divergence, herbivory, natural selection, resistance, selection mosaic, tolerance, 1696

Population Biology
Age-specific, life history, lifetime reproductive success, seabirds, selection hypothesis, 880
Allele, diffusion, Fisher equation, gene, invasion speed, selection, structured population, 470

Population Genetics
Adaptation, adaptive evolution, beneficial mutations, clonal interference, fixation, 932
Adaptation, allozymes, clinal variation, coalescent, elevational gradient, interlocus contrasts, mice, 1342
Approximate Bayesian computation, demographic inferences, invasive species, microsatellites, rejection-sampling algorithm, spatially expanding populations, 2021
Automixis, centromere interference, genetic load, haplo-lethal, mating-type bias, *Microbotryum,* self-fertilization, 702
Background selection, genetic hitchhiking, Muller's ratchet, rate of adaptation, 1403
Coalescence, dioecy, *F*-statistics, monoecy, self-incompatibility, subdivided populations, 1891
Cryptic species, gene flow, genetic structure, mitochondrial DNA, parasite evolution, salmon hosts, trematode, 198
Dominance, epistasis, genetic covariance, genetic variance, inbreeding, population bottlenecks, 1655

Population Structure
Anuran, genetic structure, microsatellite, *Rana pipiens,* temporal stability, temporal variation, variance effective size, 2536
Arabidopsis thaliana, diversifying selection, local adaptation, metapopulation, population structure, uniform selection, 1434
Arabidopsis, divergent selection, F_{ST}, herbivory, local adaptation, neutral markers, trichomes, 2830
Cetacea, divergence, nonequilibrium, reproductive isolation, 670
Covariance structure, isolation by distance, likelihood ratio test, maximum likelihood, population structure, restricted maximum likelihood, 1839

Predation
Adaptive radiation, antipredator traits, apparent competition, character shifts, divergence, *Gasterosteus aculeatus,* predation, 376
Aposematic, avian predators, frequency-dependent selection, *Heliconius* butterflies, jacamars, Müllerian mimicry, 2782
Aposematism, coevolution, imperfect mimicry, novel world, *Parus major,* predation pressure, warning coloration, 1294

Quantitative Genetics
Acquisition, allocation, bottleneck, constancy, genetic variance-covariance matrix, 1157
Adaptive landscape, genetic correlation, genetic covariance, genetic variance, net selection gradient, pleiotropy, response to selection, quantitative genetics, 1639
Adelphophagy, dispersal, larval morphology, planktotrophy, Spionidae, 2704
Amphibians, animal model, F_{ST}, genetic drift, geographic variation, Q_{ST}, 2013
Bayesian analysis, developmental stability, environmental variance, fluctuating asymmetry, Gibbs sampling, repeatability, 238
Brook charr, direct genetic, heritability, maternal-animal covariance, maternal genetic, stabilizing selection, 2002
Common principal components, evolutionary constraint, heritability, matrix comparison, phylogenetic signal, population divergence, quantitative traits, 2287
Dalechampia scandens, developmental stability, evolvability, fluctuating asymmetry, genetic variation, heritability, homozygosity, 504
Developmental instability, diallel cross, fluctuating asymmetry, genetic correlation, *Gryllus firmus,* heritability, inbreeding, quantitative genetics, 47
Energy budget, heritability, mammal, sustained metabolic rate, 421
Flower number, flower size, genetic constraint, genetic correlation, *Lobelia siphilitica,* natural selection, 732

Reproductive Isolation
Conspecific sperm precedence, *Drosophila,* hybridization, reproductive isolation, speciation, 781
Dobzhansky-Muller incompatibilities, epistasis, reproductive isolation, substitution process, 1145
Floral evolution, hybridization, plant-pollinator interaction, pollinator preference, reproductive isolation, 2634
Patterns of speciation, postzygotic isolation, reproductive isolation, sex chromosomes, 1424

Reproductive Strategies
Aquilegia yabeana, floral sex allocation, pollen and ovule number, protandry, protogyny, 1131
Cross-fertilization, mating system, parasites, recombination, sexual reproduction, 2584
Cryptic female choice, differential embryo mortality, *Gallus,* genetic incompatibility, male reproductive success, sperm-egg interactions, 416
Female fitness, fruit set, nonfruiting flowers, selective abortion, wider choice hypothesis, 2371

Selection—Artificial
Dioecious, flower number, flower size, sexual selection, *Silene latifolia,* 1936

Selection—Experimental
Colored environmental noise, experimental evolution, heat shock protein, Hsp, temperature, 741

Selection—Group/Kin
Altruism, contextual analysis, covariance, group selection, multilevel selection, Price's equation, 486
Armpit effect, Hamilton's rule, inclusive fitness, Price equation, self-recognition, viscous population, 1833

Selection—Natural
Adaptation, developmental plasticity, embryo, lizard, phenotype, thermal, 1809
Antipredator traits, divergent selection, *Gasterosteus,* natural selection, predation, 1274
Body size evolution, directional selection, macroevolution, microevolution, natural selection, selection gradient, sexual selection, 1608
Breeder's equation, elasticity, natural selection, phenotypic selection, selection gradient, 2133
Carbon isotope discrimination, fitness, leaf area, nitrogen, succulence, water-use efficiency, 2682
Climate gradient, clinal variation, global warming, phenotypic plasticity, phenotypic selection, 1446
Color, crypsis, geographic variation, sexual dichromatism, visual contrast, 1549
Experimental design, power, publication bias, regression, selection differentials, selection gradients, 479
Geographic variation, host-specific selection, migration, reproductive isolation, speciation, trait divergence, walking-sticks, 102

Selection—Sexual
Allometry, correlational selection, dance flies, mating success, nonlinear selection, nuptial gifts, 1763
Antagonistic coevolution, female choice, genitalia, male-female conflict, sexual selection, 1947
Cryptic female choice, male ornaments, *Poecilia reticulata,* postcopulatory sexual selection, sperm competition, 665
Developmental instability, *Drosophila bipectinata,* fluctuating asymmetry, genetic variation, sex comb, sexual selection, 597
Effective population size, F_{ST}, haplotype diversity, *Homo sa-*

piens, opportunity for selection, sex difference in selection, sexual selection, 1613
Functional integration, genetic constraints, genetic correlations, quantitative genetics, sperm competition, 1773
Gasterosteus aculeatus, immunocompetence, mate choice, mean d^2, parasite load, reproductive success, sexual selection, 2498
Good genes, runaway process, sex linkage, sexual selection, 683
Condition dependence, genetic variance-covariance matrix, genic capture, sexual selection, 2754

Sex
Bacteria, endosymbionts, Insecta, mutualism, pseudoarrhenotoky, symbiosis, 790
Bag worm moth, cost of sex, parasite hypothesis, parthenogenesis, Red Queen hypothesis, *Wolbachia*, 1511

Sex Ratio
Age at maturity, fecundity, life history, lizard, prenatal sex ratio, viviparity, 2511
Ants, colony productivity, *Pheidole pallidula*, queen-worker conflict, sex ratio, 1141
Comparative analysis, protandrous, protogynous, sequential hermaphrodite, sex allocation, sex ratio, 1019
Demographic stochasticity, local mate competition, local resource competition, mating systems, 2398
Diptera, *Drosophila*, male-killers, meiotic drive, selfish genetic element, *Wolbachia*, 2382

Sexual Conflict
Accessory gland proteins, *Cyrtodiopsis whitei*, seminal fluid, sperm incapacitation, sperm precedence, 1622
Accessory gland proteins, *Drosophila melanogaster*, experimental evolution, mating frequency, sex ratio, sexually antagonistic coevolution, 1028
Antagonistic coevolution, direct selection, multiple mating, sexual selection, *Stegodyphus lineatus*, 1135
Bindin, dominance, lysin, polymorphism, sexual conflict, trade-offs, 1414
Coevolution, fitness, reproduction, sex ratio, sexual selection, sperm competition, 1383
Corixidae, disruptive selection, mating behavior, sexual conflict, sexual dimorphism, sexual selection, *Sigara falleni*, 1861
Fitness, sexual conflict, sexual selection, sexually antagonistic coevolution, 1389

Signaling/Courtship
Allometric dispersion, allometry, condition dependence, *Cyrtodiopsis dalmanni*, sexual selection, stalk-eyed flies, 1038
Cricket song, mate recognition, phonotaxis, preference, sexual selection, signal, 1627
Diversity, insect communication, mate choice, speciation, vibrational signals, 571

Sociality
Acromyrmex, herd immunity, *Metarhizium*, parasite, polyandry, social insect, 1251
Ants, DNA microsatellites, *Formica*, gene flow, inbreeding, mitochondrial DNA, 2462
Breeding system, dispersal, genetic structure, microsatellites, relatedness, social evolution, social structure, 1064

Speciation
Adaptation, biogeography, ecology, natural selection, niche, speciation, vicariance, 193
Adaptive dynamics, diauxie, experimental evolution, phenotypic plasticity, sympatric speciation, 245
Adaptive radiation, dispersal, Hawaii, pollination, speciation, 2185
African cichlids, ecological selection, mate preference, modeling, sympatric speciation, 222
Allan Wilson, Aves, divergence time, Mammalia, regulatory evolution, reproductive isolation, speciation, 1865
Allochronic speciation, aphids, life cycle, phenology, reproductive isolation, speciation, sympatric, 539
Allopatry, bird song, cultural evolution, gene-culture coevolution, learning, model, speciation, 2049
Atlantic, Bayesian, biodiversity, Indo-West Pacific, speciation, 2227
Avian speciation, mitochondrial DNA divergences, phylogroups, Pleistocene, sister species, 1122
Bioclimatic modeling, gene flow, historical isolation, local adaptation, range limits, secondary contact, sympatry, 1573
Caribbean, coral reef, hybridization, *Montastraea*, sibling species complex, 324
Carlia rubrigularis, hybrid zone, likelihood profiles, phylogeography, secondary contact, speciation, 1536
Chromosomal inversions, *Drosophila persimilis*, *Drosophila pseudoobscura*, hybrid sterility, speciation, 1856
Cline, gene flow, mammals, reproductive isolation, speciation, 2064
Colonization of niches, genetic divergence, learning, speciation, Viduidae, 35
Colonization, genetic divergence, Hawaiian Islands, migration, speciation, speciation-threshold model, West Indies, 1664
Conspecific sperm precedence, cytochrome oxidase II, fertilization incompatibilities, ground cricket, internal transcribed spacer, 12S mitochondrial DNA, 2409
Coral reef, fertilization, hybridization, mass-spawning, speciation, 308
Cospeciation, gene flow, geographical mosaic theory, host tracking, local adaptation, mutualism, vicariance, 1730
Diversification rates, molecular clocks, penalized likelihood, reproductive isolation, sympatric speciation, 2797
Echinoid, gamete recognition, hybridization, selection, speciation, 1225
Ecotone, habitat preference, molluscs, parapatric speciation, polymorphism, reproductive isolation, 2734
Genetic distance, plants, polyploidy, postzygotic, prezygotic, reinforcement, speciation, 1195
Male preference, mate discrimination, premating isolation, speciation, threespine sticklebacks, 1099
Model, postmating isolation, reinforcement, sexual selection, simulation, species recognition, weak selection, 913

Symbiosis
Applied entomology, cytoplasmic incompatibility, microbial genomics, population replacement, *Wolbachia*, 2156
Asobara tabida, cytoplasmic incompatibility, multiple infections, mutual dependence, symbiosis, *Wolbachia*, 2167
Coevolution, cospeciation, *Decacrema*, *Macaranga*, myrmecophyte, phytoecy, Southeast Asia, 554
Compatibility types, cytoplasmic incompatibility, evolution, *mod resc* model, *Wolbachia*, 1901

Trade-Offs
Anopheles gambiae, genetic correlation, insect immunity, melanization, trade-offs, 2377
Antagonistic pleiotropy, litter size, mammal, maturation, phenotypic and genetic correlations, trade-off between offspring size and number, 645
Coevolution, genetic constraints, indirectly transmitted pathogens, schistosomes, trade-offs, 1178
